

## The Professional Learning Log

The professional learning log can be undertaken as an individual or a group. For example, distribute an article on the following list (these articles are Useful Information pieces from several domains, including the Professional) when you meet. One of the group undertakes to present the main idea, the group discusses it and other ideas in the article, and how they may want to follow them up in their own work. At the end of the meeting the next meeting topic is decided.

When you next meet, discuss any follow-up to the previous discussion and then proceed with the new article.

Please feel free to download the template as hard copy or keep it as a file on your computer.

## The Professional Learning Log

Useful Information piece	The main idea	How it can be applied in my work/at my school	Questions	Further sources/ actions to try out this concept/approach
